

AGMASTER SEEDING PROFILES

NT 19 ADJUSTA-POINT AND HOLDER

The NT19 Adjusta-Point is our latest and recommended Point & Holder system for C-Shank tynes. The key features are:

- HEIGHT ADJUSTABLE with three different settings to allow for lowering of point as it wears or for more below the seed cultivation if desired.
- SECURE BOLTING ARRANGEMENT by using a u-bolt for the point holder to help prevent sideways movement if the tyne bolt becomes loose or worn. There is only one tyne bolt which is easily accessible.
- COMPATIBLE with current range of Agmaster boot assemblies such as Multi-Boot, NT19 Rigid Boots & Brackets and FlexiBoots as pictured on pages 4 - 5.
- ADAPTABLE for use with our popular NTTT Rigid Seeding Boots by using a customised u-bolt.
- SECURE TRASHGUARD design which is fixed directly to top of point holder. Design doesn't affect access to point retaining pin. These are included as standard in all NT19 seeding kits.
- LIQUID point options available
- LO-THRO or STRAIGHT profiles to choose from
- EASY ACCESS M12 PIN & R-clip

For complete seeding kits, see pages 4-7
For spare parts and accessories such as
trashguards and liquid kits, see pages 15-16

For all Seeding Kit part numbers and their prices, use our Seeding Kit Builder at www.agmaster.com.au

All prices exclude any freight costs that may apply

NT19 SEEDING KITS FOR C-SHANK TYNES

The seeding kits pictured on pages 4 & 5 suit a range of Double-Bolt C-Shank tynes. Each series has options available to suit standard 50mm Flat tynes as well as 30mm Edge-On tynes.

NT19 Paired-Row Multi-Boot Kits

- Height-adjustable point. Standard and Liquid options
- Modular boot. Easily interchange between paired-row and single-row
- Suits both single-shoot & dual-shoot programs; optional dry fertiliser boot available if required
- Good capability for directing liquid behind the point
- Provision for wetter with seed

For more detailed information about the Multi-Boot system see pages 6 - 7

PRICE:

Kit as pictured \$365 +GST

Wetter with seed tube not included in kit, ordered separately

More kit options and prices can be found on page 7

NT19 SEEDING KITS FOR C-SHANK TYNES

The seeding kits pictured on pages 4 & 5 suit a range of Double-Bolt C-Shank tynes. Each series has options available to suit standard 50mm Flat tynes as well as 30mm Edge-On tynes.

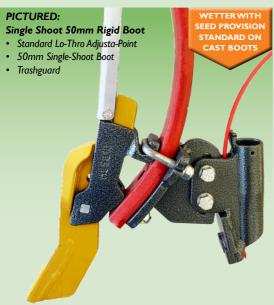

NT19 Flexi-Boot Kits

Progression of our NT11 Series

- Height-adjustable point. Standard and Liquid options
- The seeding boot is a stiff but flexible hose with 40mm closer plate which self-cleans in heavy soils
- Suits both single-shoot & dual shoot programs
- Allows banding of fertiliser in knife point slot when dual shooting
- 50mm closer available for wider spread in light soils

PRICE:

Standard Kit as pictured \$325 +GST

NT19 Rigid Boot Kits

Progression of our NT11 Series

- Height-adjustable point. Standard and Liquid options
- Height-adjustable boot
- Multiple boot options to suit both single-shoot & dual shoot programs (see p17)
- Choice of 40mm 50mm closer on single-shoot boot (pictured)
- Improved bolt accessibility on bracket at back of tyne
- Weld-on closer plates available for self-repair

PRICE:

Standard Kit as pictured \$255 +GST

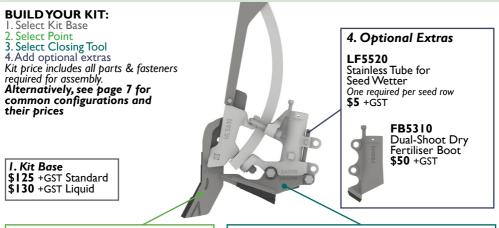

See page 17 for other boot options and kit price difference.

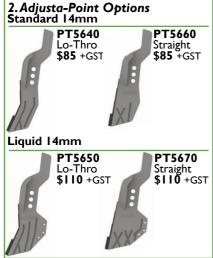

NT 19 MULTI BOOT C-SHANK

WETTER WITH SEED NO W AVAILABLE ON BOTH PAIRED-ROW & SINGLE-ROW SYSTEMS

The Multi-Boot seeding system is a modular kit for double-bolt c-shank tynes which allows flexibility to choose between multiple paired-row and single-row closing tool options. The key features of this system are:

- Multiple closing tool options with flexibility to easily alternate between paired and single-row depending on conditions and crop type. See below graphic for details.
- Compatible with both NT19 Adjusta-Point and NT11 Point & Holder systems
- Optional dry fertiliser boot is available for dual shoot systems
- There is provision for liquid down the knife point slot and/or wetter with the seed
- A secure bolting arrangement on the closing tool and dry fertiliser boot
- Bracket options to suit 50mm Flat C-Shank tynes and 30mm Edge-On tynes

NT19 MULTI BOOT ASSEMBLIES

The seeding assemblies below include the parts pictured as well as all bolts and fasteners required for assembly. Please note that X's in part #'s need to be filled with a figure depending on machine type, tyne type & seeker width (if applicable). For assistance please contact Agmaster, your local dealer or use the Seeding Kit Builder www.agmaster.com.au

NT20M MULTIBOOT FOR MORRIS QUANTUM, C2 & C3

This system is a modular seeding kit to suit various Morris parallelogram modules which allows flexibility to choose or alternate between multiple paired-row and single-row boot options. The key features of this system are:

- Multiple closing tool options with flexibility to easily alternate between paired and single-row depending on conditions and application. See below for details.
- Secure bolting arrangement on the closing tool and dry fertiliser boot.
- Height-adjustable point is secured with an easy-access pin and there is no load on the pin when working.
- Optional dry fertiliser boot is available for dual shoot systems
- Liquid point option available and all boot options come liquid ready.

NT20B MULTIBOOT FOR BOURGAULT PARALINK

This system is a modular seeding kit to suit the Bourgault Paralink module which allows flexibility to choose or alternate between multiple paired-row and single-row boot options. The key features of this system are:

- Multiple closing tool options with flexibility to easily alternate between paired and single-row depending on conditions and application. See below for details.
- Secure bolting arrangement on the closing tool and dry fertiliser boot.
- Height-adjustable point is secured with an easy-access pin and there is no load on the pin when working.
- Optional dry fertiliser boot is available for dual shoot systems
- Liquid point option available and all boot options come liquid ready.

NT21M DUAL IN-LINE FOR MORRIS QUANTUM/C2/C3

Our Dual In-Line system for the Morris Quantum & Contour 2 was developed in response to demand for dual-shoot single row in-line systems for these machines. Seeding Kits include I2mm height-adjustable point(liquid option available), seed & fertiliser boots and all bolts and fasteners.

EMU TRACKER WHEELS

Agmaster Emu Tracker wheels have a unique design which addresses the issue of presswheel furrow smearing on parallelogram seeding modules such as the following (other makes may also be adaptable):

- Morris Quantum
- Morris Contour 2
- Bourgault Paralink
- Horsch Sprinter
- Flexicoil PD5700

The Emu Tracker replaces the existing wheel on the module. The flexible feet flick some of the loose soil back into the seeding row while giving some pressing effect. They are most effective in moist soil conditions.

PRICE: Wheel as pictured \$250 +GST

NT08 Series Bolt-On Kits

For single bolt cultivator and scarifier tynes in the 90 - 150kg breakout range. Standard single system included a 12mm point and depth adjustable 40mm boot assembly. See page 17 for other boot options and kit price difference.

NEW!

NT08 Seeding Kits suit the following tynes: Shearer 580 & 620, Forward/Chamberlain 270, 700 & 800 series, Alfarm, John Deere/International Scari & Shearer Scari

PRICES:

Standard Single Shoot Kit as shown \$185+GST Replacement Points \$70 +GST

For all Seeding Kit part numbers and their prices, use our Seeding Kit Builder at www.agmaster.com.au

All prices exclude any freight costs that may apply

NT19 & NT11 ACCESSORIES

Trashguards & Sweep Adaptors

TRASHGUARDS

These saddle the point holder and secure to the holder or tyne to provide better trashflow in heavy residue. There are two styles for NTII and NTI9 Adjusta-Point and suit both flat and edge-on tynes. Below prices include required fasteners

SWEEP ADAPTORS

These secure into the holder in place of the point for quick change from No-Till cultivation to conventional cultivation.
Replicates bottom of tyne to accommodate bolt-on wedge or bolt-on wide point. 3 different hole configurations are available.

Available for NTII holders only.

\$30 +GST

Liquid Kits

These kits piggy back Agmaster NT19 & NT11 rigid boot kits. They will direct liquid fertiliser from an existing liquid distribution system to the base of the tynes and into the back of a liquid fertiliser point (see pages 5 & 16). The liquid kit includes a shaped stainless tube that acts as a casing for 3 - 6mm OD flexible fertiliser delivery hose.

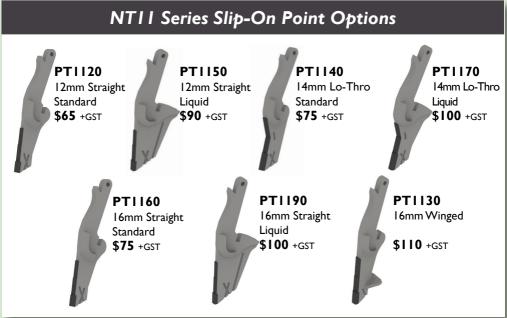

Kit does not include liquid point or flexible tube. A longer bolt may also be required to bolt clamp plate to tyne. Kits are available for 2 pipe sizes.

Single Liquid Kit: \$26 +GST

Double Liquid Kit: \$42 +GST

EMUTRACKER PRESSWHEELS

By increasing demand, the Agravailable as an individually mor run in WA & NSW over the 2 feedback including comments

Rec

By increasing demand, the Agmaster Emu Tracker wheel is now available as an individually mounted Presswheel Module. These have been run in WA & NSW over the 2021 and 2022 seasons with positive customer feedback including comments of:

Reduction in chemical damage on edge of furrow Fewer weed escapes at edge of rows

Less smearing in wet conditions

- Improved seed coverage
 - Reduced mud build up on tyre in sticky soils

PRICES:

Presswheel module as pictured with I30mm wide Emu Tracker tyre

PWE130 \$485 +GST

As with our usual presswheel range, these units mount to a false bar behind the last rank of seeding tynes. Additional features include:

- Individually mounted for independent pressure
- Greasable hubs
- Self tracking
- Down-pressure adjustable
- Extra inner-spring option for additional pressure
- Can be lifted and locked when not required
- Robust aluminium rims module weight 18kg

See page 21 for Presswheel mounting options

LIMITED STOCK AVAILABLE FOR 2023

PRESSWHEEL MOUNTING OPTIONS

FIXED EXTENSION ARM

Used when presswheels are permanent with provision for an adaptor plate to be welded to end of main arm to add harrows in combination. If no harrows are used, 2 arms are required per section. A 3rd arm is recommended for any section with more than 18x Standard Presswheels or 12x Emu Tracker Presswheels. Typical single fold machine will require 6 or 7 arms. Mount bar secures to end of these arms. Weight 31kg

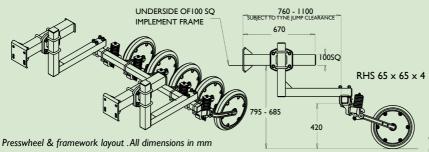

\$600 +GST

FIXED EXTENSION ARM WITH DOUBLE DROPPER

Used in conjunction with above arms of short sections of folding machines i.e. 7ft or less with up to 10x Standard Presswheels or 7x Emu Tracker Presswheels. Typically used on short outer wings of double fold machines. Mount bar secures to end of arm. Weight 38kg

\$750 +GST

WORKING GROUND LEVEL

For Presswheel Module & Fixed Extension calculator, use our Presswheel Builder at www.agmaster.com.au

All prices exclude any freight costs that may apply

NO-TILL HARROWS

Agmaster No-Till Harrows have been developed to compliment no-till seeding systems. Their non-aggressive rotary action is designed to brush loose soil from the interow back into the seed row. They have excellent

trash flow capabilities and can be used independently or in combination with presswheels.

Easy to set up and use
Working angle and
pressure adjustable

Lifts and folds with machine Excellent stubble handling

STAR HARROWS are suitable for covering behind narrow points to provide an even cover. Long life tips are replaceable. 4ft and 5ft gangs will provide the best finish. 6ft gangs are available if other sizes not suitable.

PRICES:

4ft gang with telecarrier arm \$2500 +GST 5ft gang with telecarrier arm \$2700 +GST 6ft gang with telecarrier arm \$2900 +GST Replacement Single Star Tips \$5.50EA +GST Replacement Star Tips x100 \$500 +GST
